

Universal loader Norcar A6026

Norcar a6026 is essentially a versatile working machine. The stable extension boom allows high-lift tasks to be completed easily and safely. The lifting height with pallet forks is 2.8 meters. The lifting boom is simply and comfortably controlled using a joystick with an electric switch to control extension and auxiliary hydraulics.

An adjustable steering wheel and a comfortable suspension seat provides a restful ride. The drive system with a foot throttle and direction pedal allows the loader to be controlled with incredible precision, even with demanding equipment and terrain. Norcar a6026 is an effective tool where jobs vary between loading trucks, shoveling snow, and moving soil.

Technical characteristics:

Engine - Kubota

Cylinders-3

Fuel type - Diesel

Engine capacity (cm³)-1105

Hydraulics lifting power (kg)-1150

Lift height (m) - 2,8

Power:

SAE, full power (kW/hp) - 19.4/26.4

The maximum torque (Nm) is 72

At engine speed (rpm) - 2200

The maximum engine speed without load (rpm) is 3000

Working volumes

Cooling system (l) - 6

Engine oil (l) - 4.5

Fuel tank (l) - 20

Hydraulic tank (l) - 50

The total volume of the hydraulic system (l) is 55

Characteristics

Lifting capacity (kg) - 1150

Break-off force of 50 cm (kg) - 960

Straight load (kg) - 960

Overturning load, hinged (kg) - 770

Operating weight (kg) - 1320

Movement speed (km/h) - 0-11

Traction force (kg) - 950

Year of production – 2019 y.

Condition-new (14 m.h)

Price - 27500 €*

* Netto Price, FCA Rzeszow, Poland
